ASSUMPTION

1. You've already installed your PNPKI digital certificates in either:
 - a. Windows: via the Windows Certificate Store, or
 - b. macOS: via Keychain Access.
2. You already know How to Digitally Sign PDF files using Adobe Acrobat Reader
3. You now want to enable Timestamping for added authenticity.

If you haven't completed the steps above, start with these guides:

Install Certificate:

·For Windows: [How to install your certificate on the Windows Certificate Store](#)

·For macOS: [How to import your certificate into Keychain Access](#)

Digitally Sign PDFs in Adobe: [Digitally Signing PDF with Adobe](#)

What is Timestamping?

By default, Adobe applies the date and time from your computer when digitally signing a document.

Timestamping adds the official time from a trusted Timestamp Authority (TSA) maintained by the Department of Information and Communications Technology (DICT), verifying the signature's integrity, even if the certificate later expires or is revoked.

Note: You must be connected to the internet when applying a timestamp.

HOW TO ADD THE PNPKI TIMESTAMPING IN ADOBE

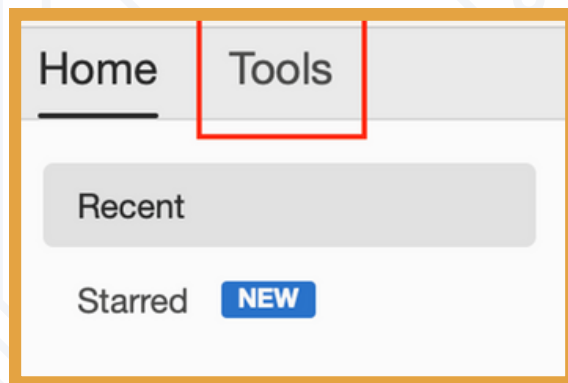

For Both Windows and MacOS:

1. Open your PDF in Adobe Acrobat Reader DC (or later version).
2. Go to the top menu and click **"Tools"**.

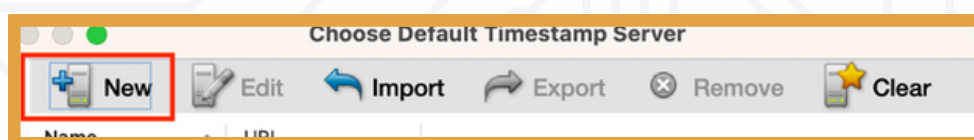

3. Select **"Certificates"** or **"Use a Certificate"** (under the Forms & Signatures section).

4. In the **"Certificates"** toolbar that appears, click the **"Time Stamp"** tab to open the Choose Default Timestamp Server.

5. In the Choose Default Timestamp Server window, click New to add a timestamp server.

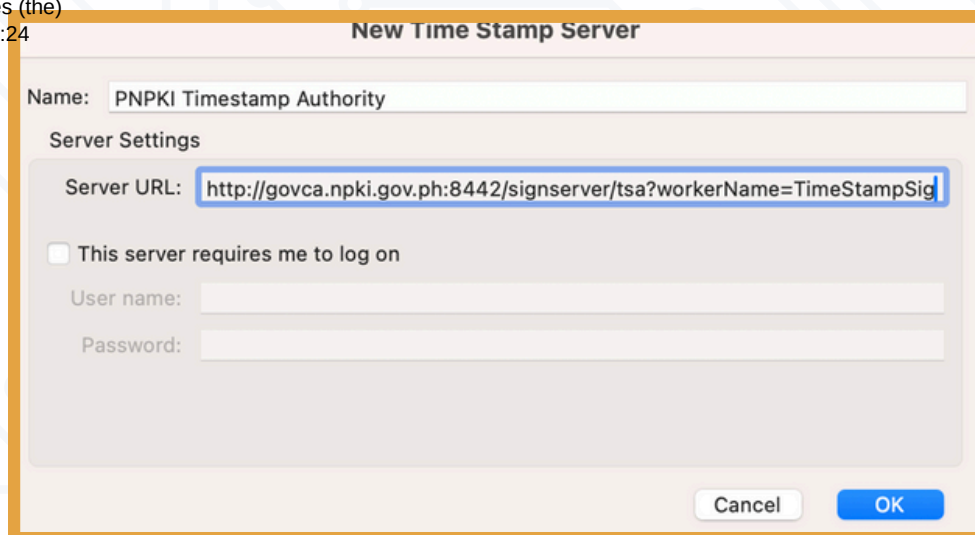

6. In the "New Time Stamp Server" window, enter the following details:

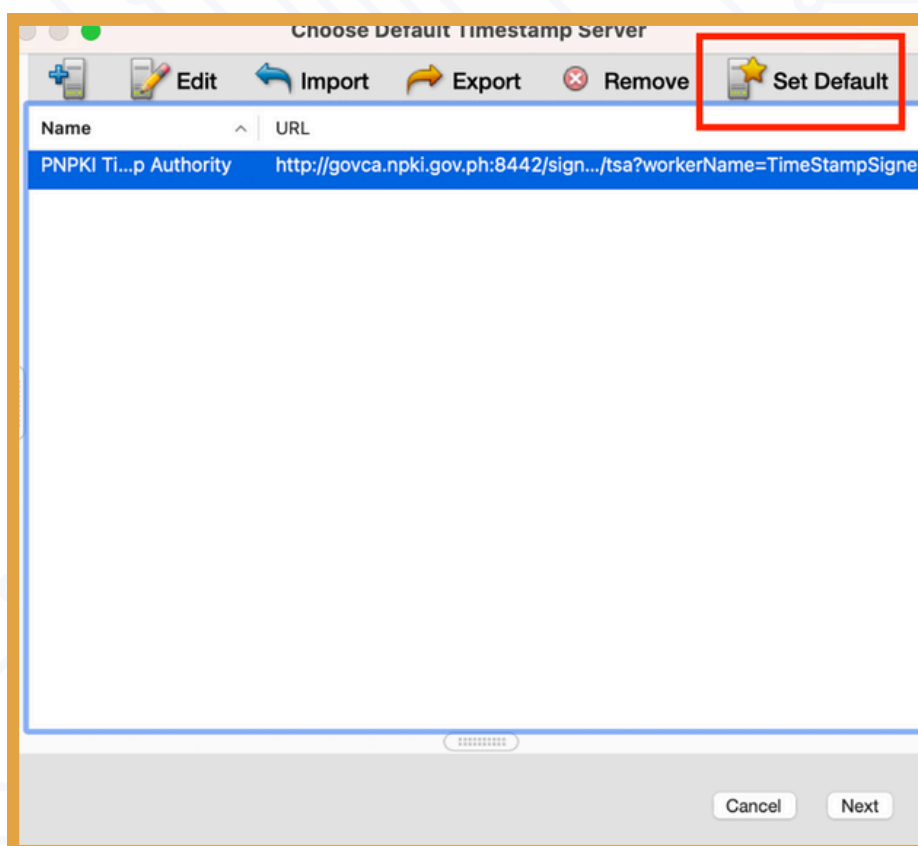

- Name: e.g., PNPKI Timestamp Authority
- Server URL: <http://govca.npki.gov.ph:8442/signserver/tsa?workerName=TimeStampSigner>

8. It might show a confirmation like the figure below. Just click on **"OK"**. If you don't want it to always appear when you are signing, put a **check** next to **"Do not show this message again"**.

9. Click **"Next"** to save.
10. Now, sign your PDF. The timestamp will be automatically applied along with your digital signature.

HOW TO VERIFY THE TIMESTAMP AFTER SIGNING

1. Open the signed PDF in Adobe Acrobat Reader DC.
2. Click the **"digital signature"** button or go to the **"Signature Panel"** to locate a specific digital signature in the document.

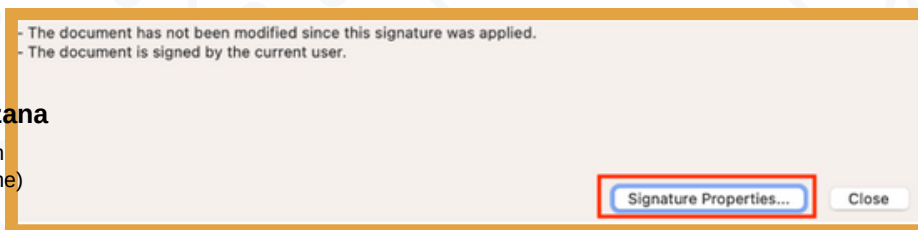

3. Click the *"Signature Properties"*.

Date: 2025-10-21 11:10:24

4. In the *"Signature Properties"* window, under the *"Validity Summary"* section, look for the time of signing showing:

- Timestamp time.
- Signature was validated as of the secure(timestamp) time.
